---

### ABOUT ME

Entry-level Python Developer with hands-on experience building and customizing ERP modules in Odoo 19, including custom models, views, workflows, and QWeb reports. Skilled in Python, PostgreSQL, and REST API development, with additional exposure to backend frameworks such as FastAPI and frontend technologies including React and JavaScript. Comfortable working across the stack, from data models and business logic to user-facing views, and quick to learn new tools and codebases. Seeking a Python Developer or Python Odoo Developer role to contribute technical skills and grow within a development team.

### EDUCATION

Rohini College Of Engineering and Technology | 2022 - 2026

BE - ECE | CGPA - 70%

Arunachalam Higher secondary school | 2021 - 2022

HSC - Computer Science | Percentage - 71%

### INTERNSHIP

**Alo Info-Tech, Nagercoil | Dec 2025 - Mar 2026**

#### Frontend Development Intern

- Developed responsive web applications using HTML5, CSS3, JavaScript, Bootstrap, and React.js.
- Built reusable UI components and improved user experience across multiple devices.
- Collaborated in testing, debugging, and optimizing web applications for better performance.
- Utilized Git and GitHub for version control and participated in real-world project development.

**Banibro Technologies PVT. LTD, Nagercoil | JULY 2026 - Present**

#### Python Developer ( Odoo)Intern

- Developed and customized Odoo 19 modules using Python, including custom models, views, actions, and menus, and extended core models such as sale.order and sale.order.line through inheritance.
- Customized Odoo Sales workflows and created custom Product Make/category functionality for product filtering
- Configured access rights, user groups, and record rules to manage data security and permissions
- Designed QWeb PDF reports, including customized quotation reports with dynamic content and reusable headers and footers
- Worked directly with PostgreSQL databases and debugged RPC errors, model registration issues, access errors, and Odoo view/validation errors.

### SKILLS

- **Programming:** Python, JavaScript, SQL
- **Python / Backend:** Python, FastAPI, REST APIs, SQLAlchemy, Celery, Redis
- **ERP:** Odoo 19, Odoo ORM, QWeb, Odoo Module Development, Odoo Model & View Inheritance
- **Database:** PostgreSQL
- **Frontend:** HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, VS Code, Docker, Postman
- **Operating Systems:** Ubuntu/Linux, Windows

# PROJECTS

## Blessings Boutique – Full-Stack E-Commerce Web Application | Freelance Project

**Tech Stack:** Python, FastAPI, PostgreSQL, React.js, Vite, SQLAlchemy, REST API, Payment Integration, Gmail SMTP, Twilio WhatsApp, Render

- Developed and deployed a real-world e-commerce website for a boutique client with a responsive frontend and FastAPI backend.
- Implemented product management, online checkout, payment processing, order creation, and automatic stock updates.
- Integrated automated email order confirmations and WhatsApp notifications for customer communication.
- Built secure admin-protected CRUD operations and managed application credentials using environment variables.

**GitHub** : [GitHub](#)

**Live Demo:** [Blessings Boutique](#)

## Student Management System – Odoo 19 | Local Development Project

**Tech Stack:** Python, Odoo 19, PostgreSQL, XML, QWeb

- Developed a custom Odoo 19 application to manage students, classes, subjects, departments, teachers, semesters, fees, and marks.
- Implemented Many2one, One2many, and Many2many relationships with enrollment workflows, wizards, and action buttons.
- Configured user groups, access controls, and record rules for secure role-based access.
- Created customized QWeb PDF student reports with structured and reusable layouts.

## Sales Module Customization – Odoo 19 | Local Development Project

**Tech Stack:** Python, Odoo 19, PostgreSQL, XML, QWeb

- Customized Odoo 19 Sales models and views using inheritance without modifying the core source code.
- Implemented Product Make and category-based filtering along with customized salesperson and source fields.
- Configured access permissions for custom sales features and models.
- Developed customized quotation PDF reports with static headers/footers and dynamic sales data.
